

Group of 2019 Q3 & Q4

Members

Table 1. Student list of 2019 Q3-Q4

Student	Study Major
Lars Assen	SE
Dion Koster	ESA
Bas Frericks	IDS
Thijmen Bos	IDS
Dennis ter Haar	IDS

Main tasks

Our goals for this semester were to fix the autonomous driving, create a manual for future groups and to clean out any files that are not used. A common occurring problem is that project groups have a hard time starting this project. A lot of vague documentation and a lot of outdated features create a lot of confusion. To fix this problem we have decided to create a manual to help future groups get started.
